

LAB 06 – JASPREET SINGH

LAB CORRECTIONS

1. n/a

WARMUP

You may not use artificial intelligence to answer the questions below.

2.
 - a. `<i class="bi bi-floppy"></i>`
 - b. `<link rel="stylesheet" href="https://cdn.jsdelivr.net/npm/bootstrap-icons@1.11.1/font/bootstrap-icons.css">`
 - c.
 - i. Breadcrumb:
 1. Use it in an e-commerce/online shopping webpage as a navigation component that can help track a user's browsing history/path.
 - a. For instance, when an individual is using a website like Macy's they can go through and navigate through categories like men's > accessories > hats which can be a breadcrumb to allow them to click back and see more of the category they chose or see something else.
 - ii. Modal:
 1. It can be used on websites for streaming like HULU or Disney Plus and displays a login or sign-up form on the page to users without them having to leave the page.
 - a. For example, supposed a user just clicked on the Hulu webpage they can scroll on it for a bit but after some time a modal would pop asking them to log in to their account or sign up for one if they are interested and would provide a better experience since they are doing it all in the page.
 - iii. Pagination:
 1. It could be used for websites with a vast amount of content such as news webpages like CNN or FOX.
 - a. For instance, It can display all the new articles and posts in a single page and be more accessible to users since they

wouldn't have to scroll to multiple pages to find what they are looking for. Making content easier since it's all in one view/page.

BOOTSTRAP 2 PAGE
